

I remember the moment I took this photo! Benício was so tiny yet so alert at the same time! The emotion of the mother in her first contact with her little baby.

I am still speechless to describe how happy I am! My photograph awarded by the Outstanding Maternity Award! An international recognition, one of the largest maternity and family photography contests in the world, it is very gratifying!

In just 8 months of work, exclusively photographing births, I did not expect such recognition!

I am truly grateful!!
